

To all of our patients that we love, our new normal now that we open for elective dental procedures:

...Know that you are missed terribly and we are ever so grateful for your return

...Know that our office has always exceeded the guidelines for infection control and we will continue that for COVID-19 and beyond

...Know, as always, we are doing everything to keep you and our team members healthy. At this time, you may choose to enter the office wearing your own mask, but it is not required.

...Know the importance of coming alone, or having your companion or driver wait for you in the car; extra people in the dental office compromises everyone.

...Know that we are thrilled to see you, but we can't hug; your presence is the best hug ever.

...Know that your health is our biggest concern; we may ask those with high risk factors to wait before scheduling.

...Know that initially, your services may take more time; your patience is appreciated

...Know that your understanding as we rework the schedule to accommodate those patients with the most urgent dental needs, means the world to us. Imagine rescheduling three months of appointments...we will get there.

...Know that your opinion of the entire situation won't change the laws and rules that we are asked to operate under for everyone's safety, so we are going to keep the conversations about you, your health, and your best dental health and how to help you reach your dental health goals.

...Know that...above all else, we are so excited about your arrival at our office and together we can make it the best appointment ever!!!

Looking forward to seeing your teeth as much as I was my brother's years ago...
